

Registered Support Recovery Assisted Living Training Bursary Fund
Inventory of Training Opportunities

Created: October 2019

Introduction

This inventory is intended for potential applicants to the Community Action Initiative's [Registered Support Recovery Assisted Living Training Bursary Fund](#). The document provides an overview of some available training that may be relevant for agencies that offer residential support to individuals experiencing substance use. Please note that this is an optional resource that you may wish to consult as you consider potential training opportunities.

The directory was generated through online research and interviews with key informants and is not a comprehensive list of all available trainings that may be of interest to your agency.

Disclaimer

This document is for informational purposes only and is not a formal endorsement of training quality. We strongly encourage you to contact the training provider directly to verify training suitability, availability and associated fees.

Courses listed in this training inventory might not all comply with the new regulation set out by the Ministry of Health. Operators are encouraged to call the Ministry of Health Registry if they have questions about requirements in the regulation or if are unsure whether a course is eligible.

Updates

This guide is a living document and will be updated at regular intervals.

<p>Justice Institute of BC New Westminster Centre for Counselling and Community Safety</p>	<p>Title: All My Relations – Working with Aboriginal Clients</p> <p>https://catalogue.jibc.ca/Lists/Courses/CustomDispForm.aspx?ID=773&Source=https%3A%2F%2Fcatalogue%2Ejibc%2Eca%2FLists%2FCourses%2FCoursesBySubject%2Easpx&InitialTabId=Ribbon.Read</p> <p>This course provides a basic understanding of how movements of Canada’s colonial process (e.g. residential schools) impact Aboriginal clients presenting in substance use settings. This knowledge will assist service providers working within Aboriginal communities affected by the change in culture, family systems, and substance-related birth defects. (Formerly AD129)</p> <p>1 day, \$190 (February 2020, check in for additional dates)</p>	<p>Title: A Systemic Approach to Celebrating Indigenous Families</p> <p>https://catalogue.jibc.ca/Lists/Courses/CustomDispForm.aspx?ID=1849&Source=https%3A%2F%2Fcatalogue%2Ejibc%2Eca%2FLists%2FCourses%2FCoursesBySubject%2Easpx&InitialTabId=Ribbon.Read</p> <p>This course will assist the learner to develop a clinical systemic approach which will encompass traditional Indigenous knowledge on family attachment, relationships and family systems in order to facilitate working with Indigenous families and family members. Mainstream approaches that are respectful of Indigenous knowledge and appropriate and effective with Indigenous families will also be taught. The learner will begin to develop a clinical systemic approach that assists family members to celebrate their resilient relationships, enhance their attachment within the family, and enrich their ways of relating. Emphasis will be placed on relating styles that provide strength and support of family members as they experience the ongoing impacts of colonization while building on Indigenous knowledge.</p> <p>3 days, \$493 (March 2020, check back for additional dates)</p>	
<p>Canadian Mental Health Association, BC Division</p>	<p>Understanding Addiction (Online)</p>		

Training Provider	Course Details	Course Details	Course Details
Vancouver and Online	<p>https://www.understandingaddiction.ca/</p> <p>Understanding Addiction is an online learning program that seeks to equip non-specialist workers and volunteers with the knowledge, skills, and attitudes to confidently help people who face challenges with substance use and addiction. The goal of this course is to ensure that anyone in a “helping role” will be able to foster healthy relationships and build supportive environments.</p> <p>Participants will engage in eight interactive online lessons that feature opportunities for personal reflection, downloadable resources, and a facilitated forum. They will learn about topics such as: the factors behind addiction and control, the dynamics involved in helping people change their behaviour, and what to do in difficult situations. Participants will also have opportunities to practice skills that enhance client engagement while promoting safety.</p> <p>8 Online Sessions Cost: \$150 + GST</p> <p>Check website for upcoming registration dates</p>

Training Provider	Course Details	Course Details	Course Details
<p>Prince George, BC Canada V2N 4Z9</p> <p>Main Campus Phone: 250-960-5555</p>	<p>Dialectical Behaviour Therapy (DBT) is a treatment originally designed to treat borderline personality disorder (BPD). In recent years it has been increasingly used to treat many other disorders because of its usefulness in treating clients unable to manage emotions.</p> <p>Following an introduction to DBT theory and how this treatment differs from traditional cognitive behavior therapy (CBT), the course instructor, Sheri Van Dijk, discusses how DBT can be applied to working with clients facing a broad range of conditions such as depression, anxiety, and bipolar disorder, in which emotion dysregulation plays a key role.</p> <p>Through lecture and experiential exercises, students explore the four modules of DBT skills (Core Mindfulness, Distress Tolerance, Emotion Regulation, and Interpersonal Effectiveness) and learn how to teach these skills to clients. Students are also taught how to format DBT sessions to provide the structure their dysregulated clients need.</p> <p>Learning Outcomes Teach clients four sets of DBT skills to endure crisis situations and manage their emotions more effectively Applications of DBT skills to a range of psychiatric illnesses Dialectical strategies to address clients who are "stuck" in therapy Useful tools (e.g. Tracking Sheet & Behavioural Analysis) to increase structure in sessions and help clients move toward change</p>	<p>https://www.unbc.ca/continuing-studies/courses/advanced-dialectical-behaviour-therapy</p> <p>Many therapists have been introduced to core concepts of Dialectical Behaviour Therapy (DBT) through Sheri Van Dijk's workshop "Calming the Emotional Storm", as well as through her books. The Advanced Dialectical Behaviour Therapy workshop is intended for clinicians with a basic understanding of DBT who want to develop more sophisticated and targeted interventions by:</p> <ol style="list-style-type: none"> 1) Delving further into treatment planning from a DBT perspective and learning how to decide which DBT interventions will best suit a client's needs 2) Exploring how to teach the DBT skills to clients in relation to Axis I diagnoses, such as depression, anxiety disorders, and bipolar disorder 3) Discussing what to do when interventions don't seem to be moving the client forward 4) Taking a closer look at the role of the DBT consultation team <p>Learning Outcomes How to use DBT strategies and skills to treat psychiatric illnesses other than borderline personality disorder, including bipolar disorder, depression, and anxiety, and issues such as anger, grief, and self-esteem Awareness of challenges that new DBT therapists encounter, ideas to help therapists deal with client "resistance", and techniques to help clinicians manage escalating emotions during the session</p>

<p>Mental Health Commission of Canada https://www.mhfa.ca/</p>	<p>Title: Mental Health First Aid – Basic</p> <p>MHFA Basic is intended for adults interacting with adults (18 years and older). This course focuses on the four most common mental health disorders including substance related, mood related, anxiety and trauma related, and psychotic disorders. Participants who take this course are well prepared to interact confidently about mental health with their family, friends, communities, and workplaces.</p> <p>In the MHFA course, you will gain a solid understanding of the 5 basic actions of ALGEE:</p> <p>Assess the risk of suicide and/or harm Listen non-judgmentally Give reassurance Encourage professional support Encourage other supports ALGEE is the framework for having a confident conversation about mental health with family, friends, colleagues, and strangers.</p> <p>Key outcomes</p> <p>Increased awareness of signs and symptoms of the most common mental health problems Decreased stigma related to mental health Increased confidence interacting with individuals experiencing a mental health problem or crisis</p>	<p>Title: Mental Health First Aid – First Nations</p> <p>The MHFA First Nations course is intended for First Nations however, is also recommended for anyone that works with First Nations. This course can be delivered wherever there is a need, such as a First Nations community, urban organization, rural and remote. It is especially important to note this is not a culturally competency or cultural sensitivity course. It is expected that anyone who takes the MHFA First Nations course will already have an existing and ongoing relationship with First Nations people and communities. It is designed to provide an opportunity for First Nations participants and others who work with First Nations to learn and have serious conversations about mental health and wellness. Participants will reflect on their life experiences, acknowledge the historical context of the colonization of Canada and move forward to address and explore ways to restore balance on a journey to mental health and wellness.</p> <p>The EAGLE Model</p> <p>For many First Nations across Turtle Island (Canada), the eagle has a very prominent place and role. The eagle is most often seen as the messenger to the Creator and for this reason we use the acronym (EAGLE) to guide the process of implementing the five basic actions of providing mental health support to</p>
